## PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

---

PROJECT NUMBER:	0156 (Tng)	SESSION NUMBER:	1
DATE OF SESSION:	21 FEB 90	DATE OF REPORT:	22 FEB 90
START:	0855	END:	0938
METHODOLOGY:	CRV	VIEWER IDENTIFIER:	052

---

1. (S/NF/SK) MISSION: To describe the target site (Missouri Botanical Garden Climatron: a climate-controlled geodesic dome greenhouse) in Stage 2 terminology.

2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates only.

3. (S/NF/SK) COMMENTS: No Physical Inclemencies. 052 had minor difficulty decoding the Stage I ideogram which led to minor difficulties, later. Later in the session, it was discovered from 052's perceptions that 052 was not "physically oriented properly" at the site (that is, what 052 saw as "above" was horizontal, and what 052 perceived as horizontal was physically above). Post session discussion involved the physical orientation aspect, but centered mainly on proper decoding of ideograms. NOTE: Instruction began with this session on how to write a summary report, and special methods for keeping AOL out of the report.

4. (S/NF/SK) EVALUATION: 3

5. (S/NF/SK) SEARCH EVALUATION: N/A

MONITOR: 018

HANDLE VIA SKEET CHANNELS ONLY

MISSOURI BOTANICAL GARDEN CLIMATRON

This type of climate controlled geodesic dome greenhouse was the world's first. It is part of a 79 acre botanical garden founded by Henry Shaw and is a National Historic Landmark. It is 70 feet high and 175 feet in diameter containing 1500 species of tropical plants in St. Louis, Missouri.
